

Jackson Wang

The founder and CEO of e-Radio and has an extensive background with a career that spans the Canadian military where he was an Aerospace Engineering Officer, the private sector as a systems engineer with Litton Guidance and Control Systems where he worked on the U.S. Tomahawk Cruise Missile Program and in the public sector with the Ontario Ministry of Transport where he was a Senior Project Manager specializing in Public Private Partnerships.

He is the co-chairman of the US National Radio Systems Committee (NRSC) Digital Radio Broadcasting (DRB) subcommittee, and currently leads the Broadcast subcommittee of the Home to Grid (H2G) Domain Expert Working Group (DEWG) of the US Smart Grid Interoperability Panel (SGIP). He was also a founding committee chairman of Advanced Traveler Information Systems (ATIS) of the Society of Automotive Engineers (SAE) and past chair of International Organization for Standardization (ISO) TC/204 WG10.1 subcommittee on advanced traveler services integration.

Jackson is the principle author of numerous US and international patents in the field of broadcast based data-casting. He is a graduate of the Engineering Science Program at the University of Toronto and is a member of the Professional Engineers of Ontario and the Society of Automotive Engineers.
